AUTHENTIC TIN WALL PANELS

Our company strives to provide a professional and pleasant experience to all our customers. Customer service and satisfaction come first.

Our residential wall panels and back splashes are custom designed and manufactured for you home. Whether you prefer one of our stock patterns or a custom designed look, you can find exactly what you are looking for at AMC. We have over 30 years experience in the metal industry with expertise in choosing the right material for your job. Most importantly, we can measure and template your job so it is done right!

This catalog contains information about our custom fabricated panels. We have another catalog with a complete guide to our tin wall and ceiling products.

Look over our catalog and please call or email us with any questions.

Color-Tex Colored Stainless Steel Finishes

Color-Tex is a process that creates a permanent color on the surface of stainless steel. Color-Tex adds an extra layer of corrosion resistance. You can choose to apply color to a myriad of surface finishes and textures. Add texture, a satin or mirror finish or a combination to create a beautiful result.

Black

Bronze

Green

Champagne

Burgundy

Gold

Blue

Color-Tex on Texture Patterns

Bead Blasted Finishes

Our Bead Blast finish is created by using a controlled 'blast' of abrasive media on the surface of stainless steel and other metals; a beautiful matte finish is the result.

Metal-Art

By using state of the art technology, creative designs are etched into the surface of stainless steel and other metals. Choose from standard patterns or, send us a computer developed design and create your own custom panel. This technique can be combined with Color-tex and bead blasting.
